

Creating and Managing User Identities

examlabpractice.com

<https://t.me/learningnets>

Microsoft's Identity Based Management System

- You'll see the term identity vs account these days
 - Azure AD is the central directory services store
- Identities can be sync'd with your on premise Active Directory (ADDS)

The Multiple ways to Manage Identities

- Azure AD Portal (portal.azure.com)
- Microsoft 365 Admin Center (admin.microsoft.com)
- On-Premise Active Directory Domain Services with account sync through Azure AD Connect
- Powershell
