Storage Classes in Cloud Storage

- ◆ Standard: Useful for data that is accessed frequently, or for data that will be very temporary.
- ◆ Nearline: Data that is accessed infrequently, once a month or less. Backups and archiving, for example.
- ◆ Coldline: low-cost storage. This data is accessed at most once every 3 months.

Storage Classes in Cloud Storage

- ◆ Archive: Only accessed once a year. Old backups, data that will almost never be used, etc. For example, for legal or tax reasons.
