

Below are cmdlets and parameters associated with the settings shown in the video. Remember, you can find more information about these commands on Microsoft's website:

<https://learn.microsoft.com/en-us/powershell/module/teams/?view=teams-ps>

These options are in the *Microsoft Teams Admin Center > Voice > Caller ID Policies* section.

Note: Some Microsoft Teams cmdlets use the Boolean values *\$true/\$false* or *Enabled/Disabled* in PowerShell:

*\$true* or *Enabled*: Indicates that a setting or feature is On.

*\$false* or *Disabled*: Indicates that a setting or feature is Off.

## Block incoming caller ID

```
Set-CsCallingLineIdentity -Identity DemoCallerIDPolicy
-BlockIncomingPstnCallerID $true
```

## Override the caller ID policy

```
Set-CsCallingLineIdentity -Identity DemoCallerIDPolicy -EnableUserOverride
>true
```

## Calling Party Name

```
Set-CsCallingLineIdentity -Identity DemoCallerIDPolicy -CompanyName
"Customer Service"
```

## Replace the caller ID with

```
Set-CsCallingLineIdentity -Identity DemoCallerIDPolicy -CallingIDSubstitute
LineUri
```

| Microsoft Team Admin Center option | PowerShell |
|------------------------------------|------------|
| User's number                      | LineUri    |
| Anonymous                          | Anonymous  |
