Clickjacking PoC

A tool made to make your clickjacking POC's better and easy.

Running

1. Make sure you have php installed (default installed on Kali/Parrot OS)
2. Download If not already there, can also use XAMPP.
3. In the downloaded directory run command `root@rohit~ php -S localhost:8000` to start the PHP Server on port 8000.
4. Open up your browser and type `localhost:8000`
5. Type in your target website name in the box and hit load.
6. Drag and Drop the Login Buttons for PoC
7. Click on View
8. Your PoC is ready
