

# Perform Vulnerability Analysis using OpenVAS

***ILABS***  
***CEH PRACTICAL***

@mmar

**OpenVAS** is a framework of several services and tools offering a comprehensive and powerful vulnerability scanning and vulnerability management solution. Its capabilities include unauthenticated testing, authenticated testing, various high level and low-level Internet and industrial protocols, performance tuning for large-scale scans, and a powerful internal programming language to implement any vulnerability test. The actual security scanner is accompanied with a regularly updated feed of Network Vulnerability Tests which are over 50,000 in total

## Aim

In this task, we will perform a vulnerability analysis using OpenVAS.
