

1 Cisco: CCIE | This Learning Path prepares you for Cisco's CCIE Certification.

CCIE Enterprise Infrastructure

The most complete solution available anywhere, INE's CCIE Enterprise Infrastructure v1.1 Learning Path has every resource you need to prepare for Cisco's latest version of the CCIE Enterprise Infrastructure Lab Exam. From Ethernet Switching & IPv4/IPv6 Routing to SD-Access, SD-WAN, & Network Automation, this Learning Path consolidates all of our CCIE Enterprise Infrastructure resources into a single trackable path you can follow to your success!

Learning Path

Cybersecurity Associate

The "Cisco Cybersecurity Associate" Learning Path offered by INE is meticulously crafted to prepare learners for the Cisco Cybersecurity Associate certification exam. The Learning Path is based on the detailed topics and domains outlined by Cisco, ensuring comprehensive coverage of essential cybersecurity concepts. These domains include Security Concepts, Security Monitoring, Host-based Analysis, Network Intrusion Analysis, and Security Policies and Procedures. Each of these domains is systematically broken down into specific subtopics, such as the CIA triad, threat intelligence, access control models, and incident response, among others. The Learning Path consists of a series of video-based courses complemented by online quizzes designed to reinforce the learner's understanding and retention of the material. By aligning the course content with the official exam objectives, INE ensures that learners gain the knowledge and skills necessary to detect, analyze, and respond to cybersecurity incidents effectively. Whether you are starting your cybersecurity journey or looking to validate your skills with a recognized certification, the "Cisco Cybersecurity Associate" Learning Path provides the foundation and practice needed to succeed in the certification exam and advance in the field of cybersecurity.
