

Below are cmdlets and parameters associated with the settings shown in the video. Remember, you can find more information about these commands on Microsoft's website:

<https://learn.microsoft.com/en-us/powershell/module/teams/?view=teams-ps>

These options are in the *Microsoft Teams Admin Center > Voice > Calling Policies* section.

Note: Some Microsoft Teams cmdlets use the Boolean values *\$true/\$false* or *Enabled/Disabled* in PowerShell:

\$true or *Enabled*: Indicates that a setting or feature is On.

\$false or *Disabled*: Indicates that a setting or feature is Off.

Make private calls

```
Set-CsTeamsCallingPolicy -Identity StaffPolicy -AllowPrivateCalling $false
```

```

PowerShell-only calling policies (cannot be configured in Teams Admin Center)

<https://learn.microsoft.com/en-us/powershell/module/teams/set-csteamscallingpolicy?view=teams-ps#-allowcallredirect>

-AllowCallRedirect

Setting this parameter enables local call redirection for SIP devices connecting via the Microsoft Teams SIP gateway.

Valid options are:

- Enabled: Enables the user to redirect an incoming call.
- Disabled: The user is not enabled to redirect an incoming call.
- UserOverride: This option is not available for use.

<https://learn.microsoft.com/en-us/powershell/module/teams/set-csteamscallingpolicy?view=teams-ps#-callrecordingexpirationdays>

-CallRecordingExpirationDays

Sets the expiration of the recorded 1:1 calls. Default is 60 days.
