Cryptool

Cryptool

❖ Download and install the tool

<https://www.cryptool.org/en/ct1/downloads>

The screenshot shows a web browser displaying the Cryptool 1 website. The page has a dark blue header with the Cryptool 1 logo and tagline "Cryptography for everybody". Below the header is a navigation bar with four buttons: "Cryptool Portal", "Cryptool-Online", "Cryptool 2", and "JCrypTool". A secondary navigation bar contains links for "About Cryptool 1", "Documentation", "Downloads", and "Screenshots". The main content area is titled "Downloads" and features a section for "Release version Cryptool 1.4.42".

Downloads

Release version Cryptool 1.4.42

The current release version is **CrypTool 1.4.42** (released December 21th, 2021).

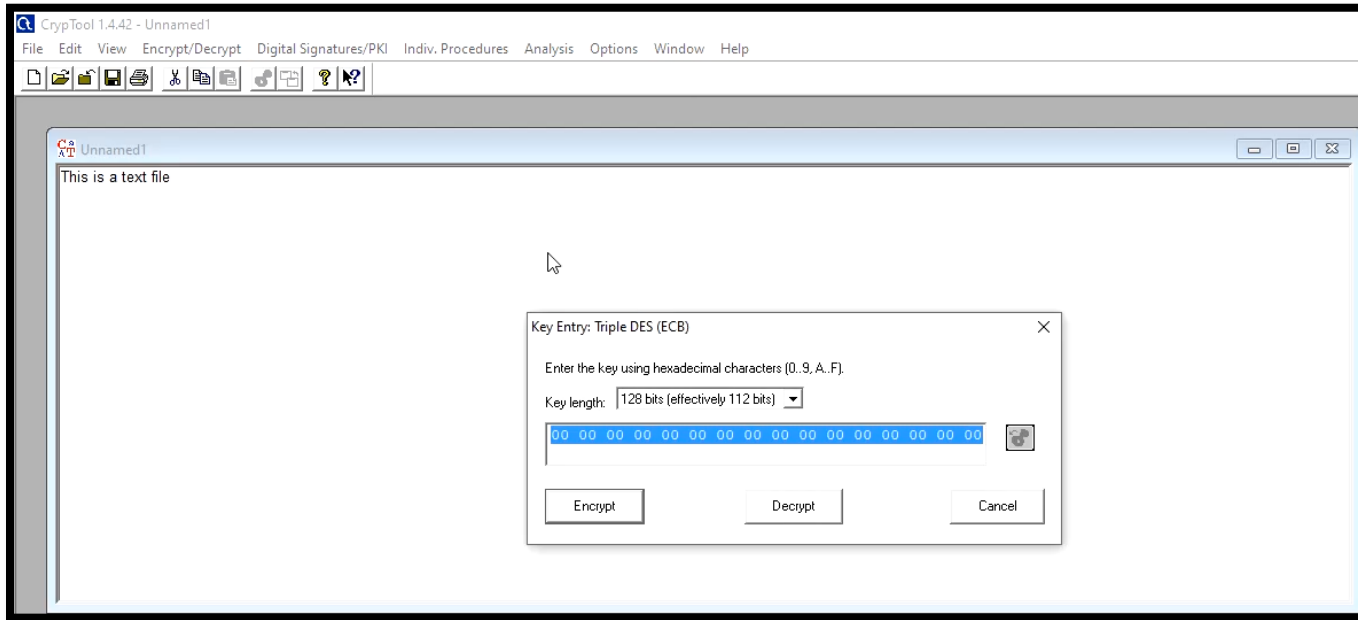

CrypTool 1 is written in C++ and requires a Win32 environment. Additionally some few Java applications are enclosed (only for them to work, a Java runtime environment is needed).

The sources are available from the [subversion repository](#). Everybody has read access to this repository (username anonymous and empty password).

CrypTool 1.4.42 is available in English, German, Spanish, Polish, Serbian, and French:

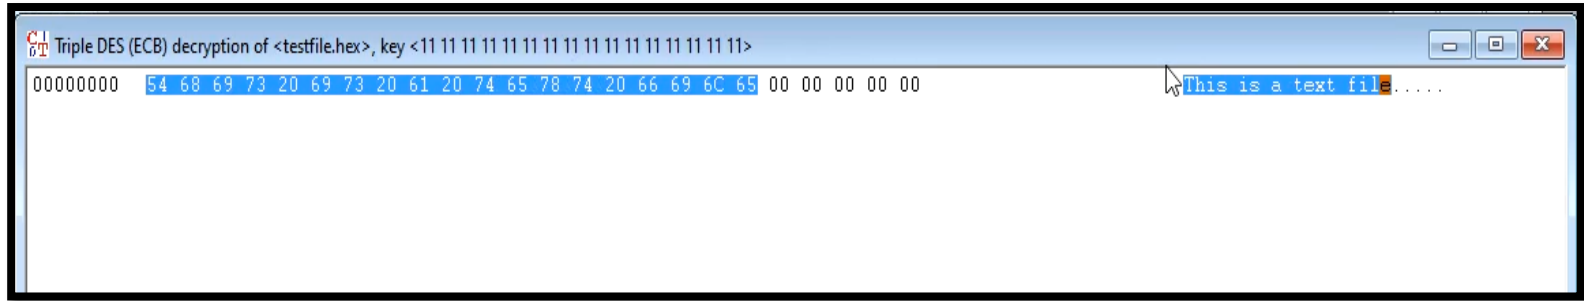

Encryption

- ❖ Create a new file and choose to encrypt it with triple DES

Decryption

- ❖ Open the file and decrypt it providing key

The screenshot shows a terminal window titled "Triple DES (ECB) decryption of <testfile.hex>, key <11 11 11 11 11 11 11 11 11 11 11 11 11 11 11 11>". The terminal output displays a hexadecimal string: "00000000 54 68 69 73 20 69 73 20 61 20 74 65 78 74 20 66 69 6C 65 00 00 00 00 00". A mouse cursor is positioned over the text "This is a text file....." which is displayed on the right side of the terminal window.
