

Multiple Files

Multiple Files

» Why multiple files?

» How to slice up capture files

- Before you run a capture, go to the launch pad, select Capture Options, and select to make multiple files
- You can select a destination and then file name
- You can slice up files based on multiple criteria options

Multiple Files

Capture on all interfaces

Use promiscuous mode on all interfaces

Capture Filter:

Capture Files

File:

Use multiple files Use pcap-ng format

Next file every megabyte(s)

Next file every minute(s)

Ring buffer with files

Stop capture after file(s)

Stop Capture Automatically After...

packet(s)

megabyte(s)

minute(s)
