

# TASKS TO COMPLETE

---

## Windows Software To-do list #7

- Deal with exceptions:
  - Use Try and Catch blocks.
- Fix a minor bug:
  - In case the given command doesn't contain any space character our parser will throw an error. Fix it by using an If statement.

If any exceptions occur return the error message as string. This information will be used for determining why our command didn't work.

***If you are new to this concept learn more about Try and Catch blocks before keeping continue.***
