

TASKS TO COMPLETE

Web Panel To-do list #1

- Create a database for control panel:
 - Use MySQL

Steps to do

1. Start the MySQL service and connect it by using ***mysql -u root -p -h localhost*** command.
2. Create a database called **ControlPanel**.
3. Create 2 tables inside the database. **users, victims**. Users table will have 3 columns; **id, username, password** and victims table will have 8 columns; **id, hostname, ipaddress, operatingsystem, workingdirectory, command, commandresult** and **joinedat**.

Use following datatypes while creating tables:

int: id

varchar(255): username, password, hostname, ipaddress, operatingsystem, workingdirectory, joinedat.

text: command

longtext: commandresult

If you are new to this concept learn more about MySQL and SQL Data types before keeping continue.
