TASKS TO COMPLETE

Web Panel To-do list #2

- Connect to MySql Service with PHP
  - Use mysqli_connect() function.

Steps to do

1. Connect to mysql service using ***sudo mysql -u root -p -h localhost*** command.

2. Update the authentication method by using ***ALTER USER 'root'@'localhost' IDENTIFIED WITH mysql_native_password BY '**YOURPASSWORD*'** command inside the mysql service.

3. Restart mysql service by using ***sudo service mysql restart*** command.

4. Change the ownership of Apache2's root directory by using **sudo chown yourusername:yourusername /var/www/html** command.

5. Open the Apache2's root directory inside ATOM coding editor.

6. Create a new file called **conn.php** and create a connection to mysql database.
