

# New Upcoming Course on Practical Software Cracking

Dear Students,

I am in the midst of preparing another new course entitled **Cracking Software Practicals**. It will be a more advanced course, where I will use **real software** instead of CrackMe's.

## Cracking Software Practicals

### Course Description

- Learn how to crack real software (for educational purposes), not CrackMe's
- Practical-based approach, using step by step clear tutorials
- All software will be provided with same version as instructor for easy follow along
- Using intermodular calls, call stacks analysis, string breaks, unpacking, anti-anti-debugging and more
- Use x64dbg, DIE, dnSpy, VB Decompiler, de4ot, HxD, Process Explorer, etc
- Crack trial software, serial key, serial fishing, patching, loaders, keygen and much more
- Crack C/C++ programs, Visual Basic, C#, .NET programs and more
- Defeat software protectors
- Lifetime course - New software being added regularly for life

If you would like to be notified of when the course is available, please go to my website and fill up the contact form:
