Enumerating Object Properties

For ...in

for...in

Summary

Iterates over the enumerable properties of an object, in arbitrary order. For each distinct property, statements can be executed.

<https://developer.mozilla.org/en-US/docs/Web/JavaScript/Reference/Statements/for...in>

Object.keys()

Summary

The `Object.keys()` method returns an array of a given object's own enumerable properties, in the same order as that provided by a `for...in` loop (the difference being that a for-in loop enumerates properties in the prototype chain as well).

Syntax

```
Object.keys(obj)
```

Parameters

https://developer.mozilla.org/en-US/docs/Web/JavaScript/Reference/Global_Objects/Object/keys

getOwnPropertyNames()

Summary

The `Object.getOwnPropertyNames()` method returns an array of all properties (enumerable or not) found directly upon a given object.

Syntax

```
Object.getOwnPropertyNames(obj)
```

https://developer.mozilla.org/en-US/docs/Web/JavaScript/Reference/Global_Objects/Object/getOwnPropertyNames
