Frankenstein

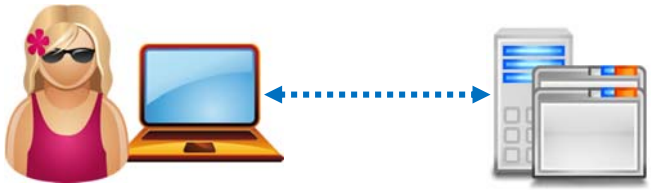
Engineered by Hackers. Presented by Professionals.

What is Frankenstein?

- Frankenstein is designed to provide user with an ease for **Searching**, **Downloading** and **Installing** the tools
- Frankenstein is divided into two applications:
  - **Server**

    This is used to manage the, n number of tools (up to 30GB) available for the client to download and maintain as a single repository
  - **Client**

    This application helps users to download and manage the tools from the Server repository



- The Tools available on Server are divided in various **categories** according to their functionality
- Users can check the tool details:
  - Version
  - Released date
  - Category
  - Size
  - Publisher
  - Website
  - Supported Operation System etc…

Why it is Made?

To provide a repository of categorized latest tools

User can download the tool in less time with comparison to manual search

It will help the user to synchronize & manage the tools from the server

User can search the tools from the available list of tools

The system provides a means to generate a HTML report of all the tools downloaded by the user
